

Wave ViewPoint

The award winning Unified Communications solution for businesses offering breakthrough simplicity and ease of use, with intuitive client applications including desktop call management, mobility, secure Instant Messaging, integrated softphone, Microsoft® Exchange integration, visual voicemail, call recording, presence information and much more.

Call Recording is an example of an application available with ViewPoint at no additional charge.

ViewPoint®, as an integral part of the Wave IP® Business Communications System helps organizations of all sizes simplify and enhance business communications. ViewPoint increases employee collaboration and productivity by streamlining and personalizing communications.

Simplify Communications

ViewPoint offers a feature-rich and highly intuitive Unified Communications client to drive adoption of collaborative communications in your organization. The award winning user interface requires minimal end user training and can be easily customized by end users to personalize every customer interaction.

ViewPoint's feature set is available to every user with Wave IP's base user licence and includes:

- Secure Instant Messaging
- Integrated Softphone
- User Presence and Status Information (multi-site)
- One-Click Call Recording and Archive Browser
- Microsoft Exchange integration
- Visual Voicemail
- VIP Call Handling
- Advanced FindMe/Follow Me services via routing lists and call rules
- SDK to extend ViewPoint features

- Desktop Call Management for any device
- Mobility

The screenshot shows the 'Call Monitor - Vertical Wave ViewPoint' application window. The interface includes a menu bar (File, Edit, View, Tools, Actions, Help), a toolbar with icons for New, Transfer, Conference, and other call functions, and a main workspace divided into several panes. A 'Dial' field is located in the top right corner. The main workspace is split into a 'Call Monitor (My Phone)' pane on the left and a 'Contacts' pane on the right. The 'Call Monitor (My Phone)' pane contains two tables: one for active calls and one for conference participants. The 'Contacts' pane shows a list of contacts with columns for Name and Company. A status bar at the bottom provides information about the last caller and current call status.

Callouts highlight the following features:

- ONE CLICK TO TRANSFER OR CONFERENCE CALLS:** Points to the 'Transfer' and 'Conference' icons in the toolbar.
- CALL RECORDING IS DIRECTLY ACCESSIBLE:** Points to a red recording icon in the toolbar.
- EASILY MAKE CALLS:** Points to the 'Dial' input field.
- SEE YOUR LAST CALL AT-A-GLANCE:** Points to the status bar text: 'Last caller: Michael Orell at 5/10/2011 3:25 PM; press F11 to return the call'.
- SEE WHO IN YOUR WORKGROUP IS AVAILABLE:** Points to the 'Contacts' pane.
- DISCONNECT OR PUT ON HOLD INDIVIDUAL CONFERENCE PARTICIPANTS:** Points to a red disconnect icon in the conference participants table.
- FORWARD YOUR CALLS WHEN YOU ARE OUT OF THE OFFICE:** Points to the 'FWD' dropdown menu in the status bar.

Collaborate Across Locations

ViewPoint is the ultimate collaboration and communications tool for employees. A rich client interface allows you to create buddy lists to see your team or view the entire organization. Users can see the availability status of colleagues locally or across locations and reach out to them with a simple click to initiate a call, a conference or secure Instant Message. ViewPoint's intuitive interface means very little training is needed and adoption is fast. Nothing could be easier to bring your organization closer together.

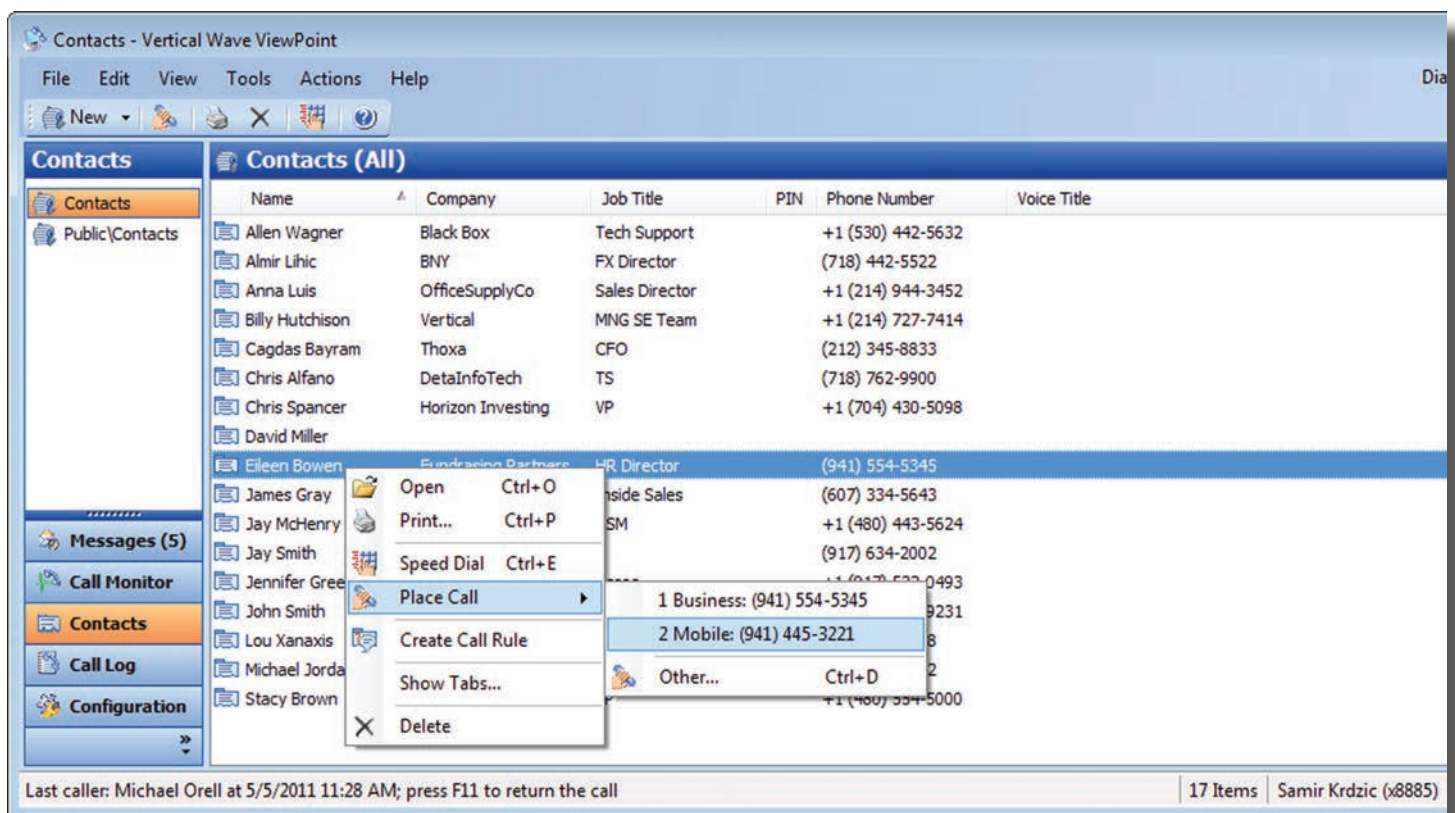

Increase Customer Loyalty and Retention

ViewPoint can enhance your relationship with customers and partners by boosting your ability to be responsive. For example, your most important clients may not know they have been designated as a VIP caller, but they will be aware that their calls are handled with a personalized response and enhanced with custom routing rules to make sure their call is always answered by you or your designated team.

Your partners and suppliers will be impressed that your employees can initiate team conference calls "on-the-fly", without false starts and dropped calls.

Compliance with Call Recording

Call Recording is a powerful tool that supports vital business functions like compliance, training, performance reviews and customer service. Yet adding this capability to a legacy phone system has traditionally required additional hardware and software, resulting in extra cost, complexity, integration issues, and employee training. With Wave IP and ViewPoint, Call Recording is built-in. Wave IP also offers a Call Recording Archive Browser where call recordings can be stored along with any data or notes associated with the call. Tens of thousands of recordings can be searched and accessed in seconds.

Right-click on any contact to place a call.

Mobility - Use any Device, Anywhere

ViewPoint doesn't tie users to their office, with its mobility features, any device can become a corporate extension and can invoke the features offered by ViewPoint. In an organization whose mobile employees have multiple phone lines, "follow me" call forwarding ensures that an employee is always reachable - on any specified line - and always has access to the full range of Wave IP features. This means a customer only needs to know one phone number for a given employee in order to reach them anywhere in the world.

And remote employees can enjoy the same features and functionality as local users. Using a simple data connection back to corporate, remote users have full ViewPoint functionality as an extension on the network - whether from a home phone, softphone or IP phone.

Using Wave IP's networking capabilities remote workers are making their calls and connection over a secure data network - so all calls are toll free.

With ViewPoint, you benefit from an extended, cost-effective communications infrastructure that is driven by business needs, not by hardware limitations.

All Features are part of the Base User License

Regardless of your organizations size or communications requirements, ViewPoint offers an extraordinary value proposition and feature set - for the cost of a basic user license. Your employees can leverage the power of Unified Communications and enjoy the associated benefits: easy collaboration, increased productivity, and new tools to enhance communications.

By enhancing all aspects of voice communication, ViewPoint helps you increase customer loyalty and, in turn, benefit from repeat business and enthusiastic referrals.

The screenshot displays the 'Call Log - Vertical Wave ViewPoint' application window. The main area shows a table of call logs with columns: From, To, Number, Start Time, Duration, Result, Left Message, and Notes. A call log entry is highlighted in blue, showing a call from Michael Orell to Samir Krdzic on 4/21/2011 at 2:16:08 PM, with a duration of :39 and result 'Connected'. The 'Notes' column for this call contains the text 'Carol, Michael is going to buy 500 units! Here you go...'. A callout box with a red arrow points to the 'Notes' column with the text 'ADD NOTES WITH EASE'. The interface includes a menu bar (File, Edit, View, Tools, Actions, Help), a toolbar with buttons for 'New', 'Associate', and a dropdown for '1 Year', and a search bar. The status bar at the bottom shows 'Last caller: Michael Orell at 5/5/2011 11:28 AM; press F11 to return the call' and '32 Items | Samir Krdzic (x8885) | FWD | Available'.

ViewPoint call log keeps a helpful record of calls you've made or received. By adding your own text notes to a recorded call, you can identify key information from that call.

KEY FEATURES

Desktop Call Management for Every User	Wave IP's base user license includes ViewPoint for every user. This award winning intuitive interface improves employee collaboration and productivity.
Secure Instant Messaging	Integrated in ViewPoint is Secure Instant Messaging so users can choose to message their colleagues across sites. All communications are encrypted and are logged and available for reporting through powerful administration tools.
Integrated Softphone	Integrated right into ViewPoint, the softphone means you don't need a deskphone to leverage the power of ViewPoint and Wave IP.
Mobility	ViewPoint's mobile features mean any phone can be an extension, your workers can have one number for all their devices, and remote workers and road warriors can take ViewPoint features on the road and never miss an important call again.
Presence Management	Work smarter by knowing the status of colleagues - who's on the phone or out of the office - before sending an Instant Message, calling, transferring or setting up conference calls.
One-Click Call Recording and Archive Browser	Users can record any call with a click and can search thousands of call recordings through an Archive Browser. With a mouse click, record any call to support compliance, training and customer service efforts.
Personalized Call Handling	Customize how each call is handled based on different call rules and attributes.
Microsoft Exchange Integration	Direct integration with Microsoft Exchange Server provides bi-directional synchronization of contacts and messages without any special client requirements. Voice mail messages can be accessed via Microsoft® Outlook, Microsoft® Outlook Web Access or any smart phone connected to Microsoft Exchange.
Visual Voicemail	View, access, save and forward messages more easily, ensuring prompt and prioritized handling.

Now you no longer have to listen to voicemail messages in the order they were recorded. ViewPoint makes it easy to listen to and act on messages based on business priority.
